Attendee shall be provided with short questionnaire prior to Cross Training Seminar to get familiar with the topic and attendee shall get information from the relevant unit in their respective institutions on the topic and questionnaire for discussion in Breakout Session.)</p> <p>(1) How to communicate with participants / customers effectively <i>(Exchange of Information Task Force)</i></p> <ul style="list-style-type: none"> - Better service comes from better communication with participants and customers. Attendees will share how they communicate and coordinate with participants to satisfy their needs and try to find an effective way, which may be a hint to other members. <p>or</p> <p>(2) Value Added Services (impact of VAS on CSDs operations and its effect on end investors) <i>(Risk & Recovery Management Task Force)</i></p> <ul style="list-style-type: none"> - CSDs globally are constantly faced with new challenges – new technologies and increased competition. With clients demanding excellent customer service, CSDs must deliver technologically advanced Value Added Services (VAS) to address these challenges and align them with business objectives. Initially, CSDs were designed to reduce risk in the market by centralizing the holding of securities, as markets grew and developed, CSDs expanded the range of services to support the back-office activities for better profits and increased investor confidence by offering VAS. 	Mekong Ballroom 1 New World Saigon Hotel

	<p>or</p> <p>(3) How to achieve cyber resilience for CSD / CCP <i>(Technical Task Force)</i></p> <p>- Cyber security has become the most important risk to CSDs/ CCPs around the world. The global post trade services have become highly networked and depend on continuous, secure and uninterrupted data flow. The highly networked environment brings cyber risks. The discussion between attendees will be carried out on the measures (such as defining cyber resilience policy, identification of Critical Information Infrastructure, encryption of data at rest and motion, authentication mechanism for user of system etc.) taken by their organization to achieve cyber resilience.</p>
