

Technical Task Force

October 2023

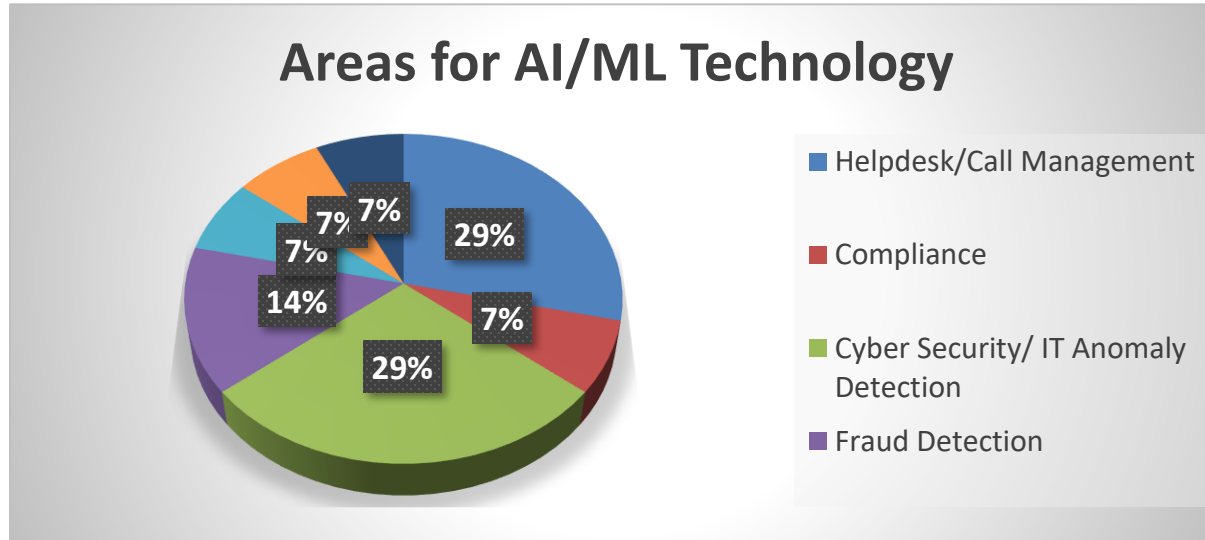

Technical Task force – Activities done

- Derived valuable statistics from AI/ML survey, and presented the same to CSD members. The survey suggests Anomaly detection, Fraud Detection and Helpdesk Management as the top 3 use cases.

Applications

- Top 3 areas where AI/ML Technologies are either being used or proposed

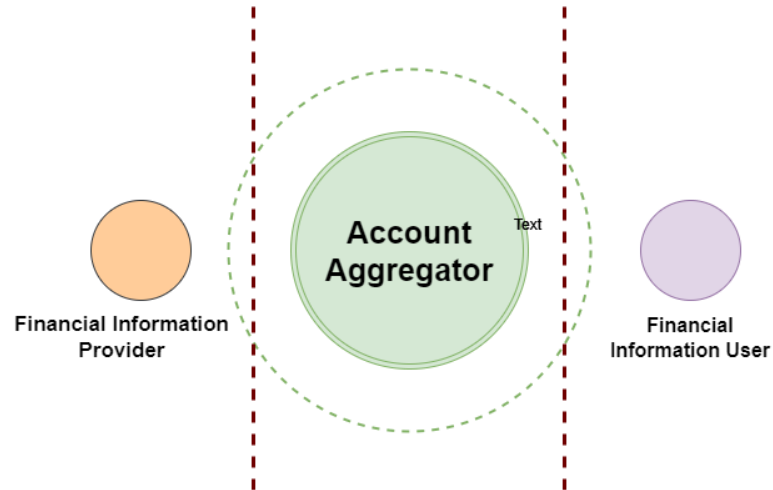

Anomaly detection, fraud detection and helpdesk/call management are top 3 use cases of AI/ML technology currently being explored.

Technical Task force – Activities done

- As part of Digital Public Infrastructure ecosystem, a case study on Account Aggregator Framework was presented in ACG CTS 2023

Account Aggregator

The Account Aggregator Ecosystem APIs describe the requirements for enabling real-time financial information aggregation functionality as set forth in the Reserve Bank of India (RBI) Master Direction-Non-Banking Financial Company.

- Well defined API
- Data structure agnostic
- Real-time
- Support Discovery
- Differentiated linking
- Ensures trust in the system
- Consent Lifecycle Management
- Data blind
- Citizen's Charter
